TREES *and* SHRUBS

Select trees and shrubs that are suited to your soil and climate. Ask your county agent, agricultural, soil, or conservationist advisor as to the best ones.

All orders sent postage prepaid at planting time.

Guarantee

These trees and shrubs should grow, if planted according to directions, and cared for properly. They are strong, active, sturdy, well rooted stock — the evergreens, other than the seedlings, at least twice transplanted. If our trees and shrubs fail to grow, and you notify us before September 15th, and send us half of the original purchase price, we will replace the stock — sending them to you prepaid.

EVERGREENS

All of these evergreens are ornamental. The Colorado Blue Spruce, grows into a substantial tree. The Pyramidal Arbor Vitae are used as speci-

men trees, for windbreaks and in doorway plantings. They grow fairly tall. The Pfitzer Junipers, Andorra, Hetzi Junipers, and the Spreading Yews are low growing shrubs used in foundation planting and especially where low shrubs are needed, as under windows.

Multiflora Rose

THE LIVING FENCE . . .

Grow a living permanent fence. And it doesn't take too long. A picture in a leading magazine shows a two year old fence successfully holding geese. It can be used to fence in a garden or a playground. As it matures it will hold stock. It is attractive, grows to a height of six to eight feet in five or six years. Ornamental with its white roses in summer, red berries in fall or winter.
